🎓 EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

BahirDar University
2018

📋 PROFESSIONAL SUMMARY

Result-driven DevOps Engineer and Technical Lead with over 6 years of experience designing scalable, secure, and automated infrastructure across cloud platforms. Expert in CI/CD pipeline implementation, infrastructure as code, and containerized deployments. Adept at leading cross-functional teams, streamlining development-to-deployment workflows, and fostering a DevOps culture rooted in automation and continuous improvement.

🧰 EXPERIENCE

SENIOR SITE RELIABILITY ENGINEER (SRE)

Kifiya Financial Technology ☑

11/2025 | Ethiopia Addis Ababa

- Experienced in integrating on-premise systems with cloud platforms, ensuring secure and efficient hybrid operations
- Implemented proactive monitoring, logging, and alerting frameworks to minimize downtime and accelerate incident resolution.
- Hands-on with OpenShift and Kubernetes, enabling scalable containerized workloads,
- Architected and managed AWS environments, including EC2, RDS, networking, and security groups.
- Designed and maintained Jenkins pipelines for continuous integration and delivery, improving deployment speed and reliability.
- Coordinated cross-functional teams during outages, authored runbooks, and drove postmortem reviews to strengthen resilience.

SENIOR DEVOPS ENGINEER

Pairing ☑

11/2025 – Present | Estonia (remote)

- *Owned and scaled the complete self-hosted infrastructure on Hetzner Cloud, delivering high reliability and performance for a growing SaaS platform while maintaining cost efficiency and security.*

Key Responsibilities:

- Infrastructure architecture and management on Hetzner Cloud (vSwitch networks, Cloud Firewall, dedicated servers)
- CI/CD pipeline development and maintenance for Rails and Next.js applications
- Database administration (PostgreSQL clustering, performance tuning, backups)
- Monitoring and observability using self-hosted tools (Prometheus, Grafana, Loki)
- Security implementation including VPN, firewalls, access controls, and auditing
- Automation of operational tasks using Terraform, Ansible, and custom tooling

SKILLS

Cloud Platforms

- AWS (EC2, Lambda, S3)
- Azure (AKS, App Services)
- Hetnzer Cloud

CI/CD

- AWS CodePipeline
- GitLab CI
- Jenkins
- Azure DevOps
- Github Actions

Containers

- Docker
- Kubernetes (EKS, AKS)

IaC

- Terraform
- Ansible

Monitoring

- CloudWatch
- Prometheus
- Grafana

Tools

- **Version Control (Git)**
- **CI/CD (Jenkins, GitLab CI, GitHub Actions)**
- **Containerization (Docker)**
- **Kubernetes**
- **Terraform, Ansible**
- **Kamal**
- **Slack, Jira, Mattermost**

PL

- C#
- flutter
- Java spring boot
- ASP.NET 
- ruby on rails
- phyton
- JS

- Team leadership and mentorship of junior DevOps engineers.

SENIOR DEVOPS ENGINEER & PRODUCT MANAGER

Telonai 

09/2024 – 09/2025 | United States (Remote)

Built and maintained scalable, secure, and automated AWS

infrastructure.

Designed CI/CD pipelines using AWS CodePipeline for consistent deployments.

Oversaw environments from development to production, ensuring

system integrity and uptime.

Worked closely with developers to enhance deployment speed and

application performance.

Advocated for infrastructure-as-code, automation, and cross-team

DevOps adoption.

DEVOPS TECHNICAL LEAD

Safaricom Telecommunications Ethiopia PLC 

07/2023 – 09/2024 | Addis Ababa, Ethiopia

Directed the DevOps roadmap and implementation of infrastructure

for enterprise systems.

Implemented and maintained CI/CD pipelines for Spring Boot

applications and Tibco APIs, automating the build, test, and

deployment processes.

Utilized tools like Terraform or Ansible to define and manage

infrastructure as code, ensuring consistent and reproducible

environments.

Providing consulting services to clients on DevOps best practices,

including infrastructure design,

automation and continuous delivery. Resulting in improved

software delivery and business outcomes.

Implemented Docker containers for packaging Spring Boot

applications and Tibco API components, and orchestrated

deployments using Kubernetes for scalability and manageability.

Standardized deployment workflows and optimized build/test/release cycles.

Setup and maintaining monitoring and alerting systems with splunk

resulting in improved system ability and reliability.

Collaboration with development teams to implement DevOps best

practices and improve development workflows, resulting in faster

and more efficient software development.

SOFTWARE ENGINEER III

Ethiopian Airlines

11/2020 – 06/2023 | Addis Ababa , Ethiopia

Responsible for Design, develop, implement, and maintain Ethiopian

Airlines Mobile Application and Ethiopian Cargo Mobile Application

from scratch using flutter

Spearheaded the end-to-end development lifecycle of both Ethiopian

Airlines Mobile Application and Ethiopian Cargo Mobile Application

using the Flutter framework.

Integrated the mobile applications with backend systems to retrieve

and update information seamlessly, ensuring data consistency and

accuracy.

Implemented Azure DevOps for continuous integration, delivery, and

deployment, automating build and deployment

processes for efficient

delivery of new features.

SOFTWARE ENGINEER II

Ethiopian Airlines ☑

11/2019 – 11/2020 | Addis Ababa, Ethiopia

Designed, developed, and maintained conversational bots using Microsoft

Bot Framework to enhance user engagement and interaction.

Implemented Natural Language Processing capabilities within bots to

understand and respond intelligently to user inputs.

Keeping up-to-date

with emerging technologies such as artificial intelligence, machine-learning

and voice assistance.

Deployed bots across multiple channels, including web applications,

messaging platforms, and voice interfaces, ensuring a broad user reach.

SOFTWARE ENGINEER I

Ethiopian Airlines

11/2018 – 11/2019 | Addis Ababa, Ethiopia

- Add features for mobile applications that were developed in Xamarin.Forms and Backed applications.
- Deployed and managed Azure Service Fabric clusters to provide a robust and scalable platform for microservice-based applications.
- Packaged and deployed applications as micro-services using ServiceFabric.

- Designed, implemented, and maintained microservices architecture using Azure Service Fabric, facilitating improved scalability and maintainability.
- Identify, assess, report and fix bug and vulnerabilities in Ethiopian Airlines Booking and back-end applications.
- Add additional features to existing Ethiopian Airlines Booking App developed in Xamarin.Forms based on product manager requirement.
- Create and built state-full and state-less REST service that using Service Fabric
